Construct a scale of 1:4 to show dm and long enough to measure upto 5 dm also mark 3.7 dm on the same scale.

$$LOS = R.F. \times \text{max. length}$$

$$= \frac{1}{4} \times 50 \text{ cm}$$

$$= 12.5 \text{ cm}$$

CENTIMETER DECIMETER 1

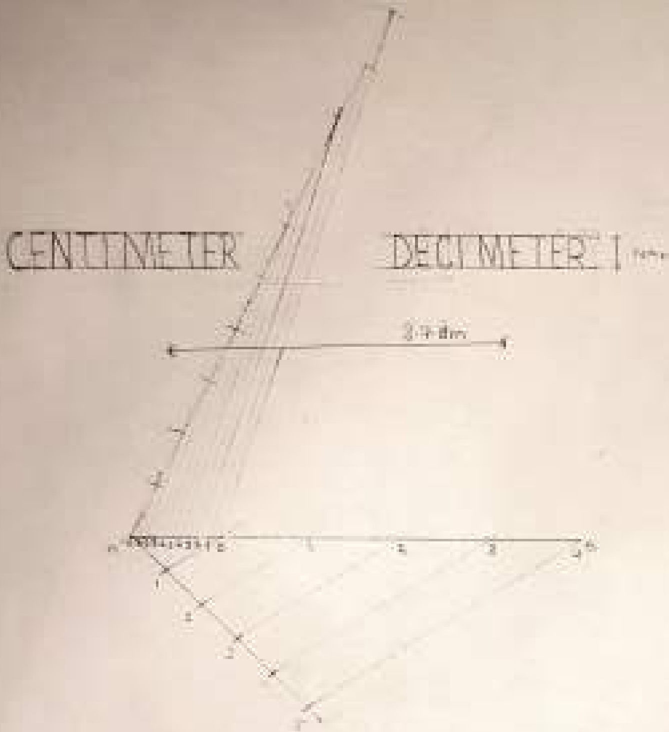
uct a scale of 1:4 to show dm and long eno

up to 5 dm also mark 3.7 dm on the same scal

= R.F. x max-length

= $\frac{1}{4}$ x 5 cm

= 12.5 cm



3.7 dm

3dm + 0.7 dm

= 3dm + 7cm

PLAIN SCALE

ugh to Construct a diagonal scale of 3:200 showing dm, m and cm and to measure upto 6 meters and show 4.56 meters on the scale.

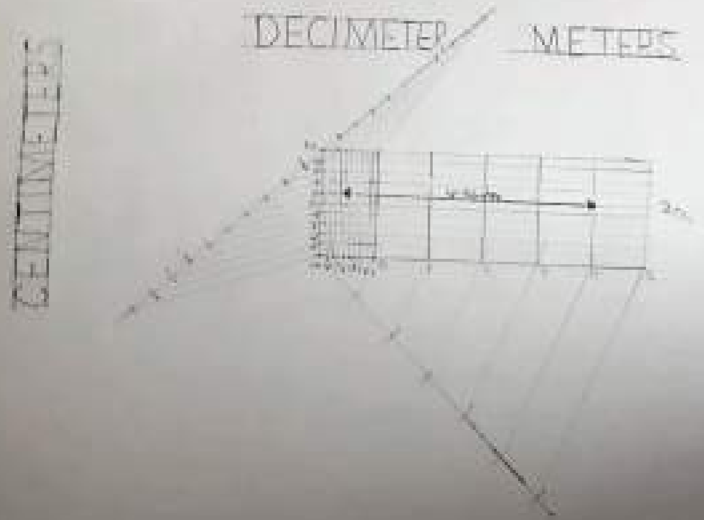
$$LOS = R.F. \times max.\ length$$

$$= \frac{3}{200} \times 6$$

$$= \frac{9}{100} = 0.09 \text{ meter}$$

$$= 9cm$$

DECIMETER/ METERS



4.56m

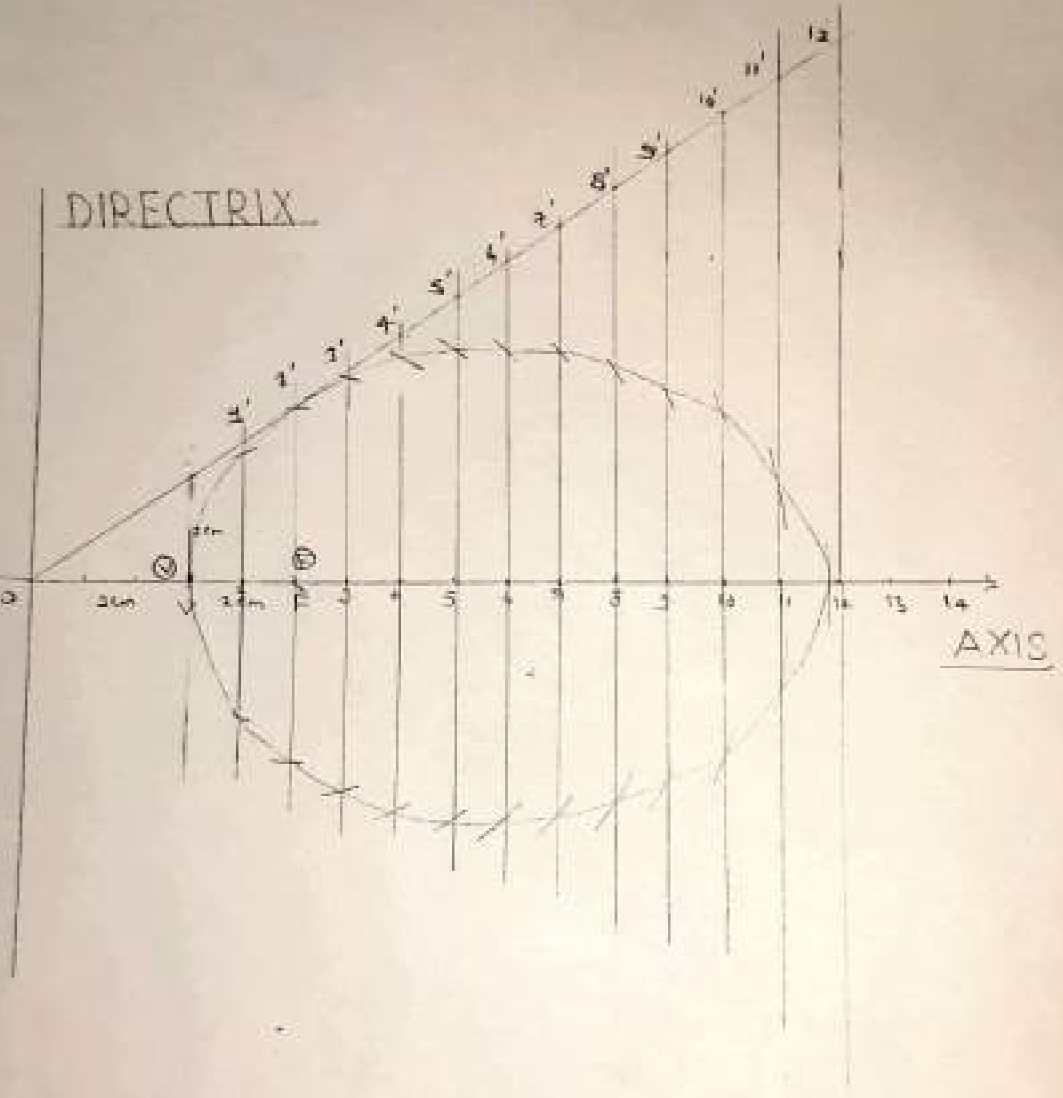
4m + 5dm + 6cm

1 Construct an Ellipse when the distance of the focus from directrix is equal to 50 mm and eccentricity is $2/3$

2 Construct an E...
from directrix
is 2

focus from directrix is equal to 30mm and

eccentricity is $2/3$



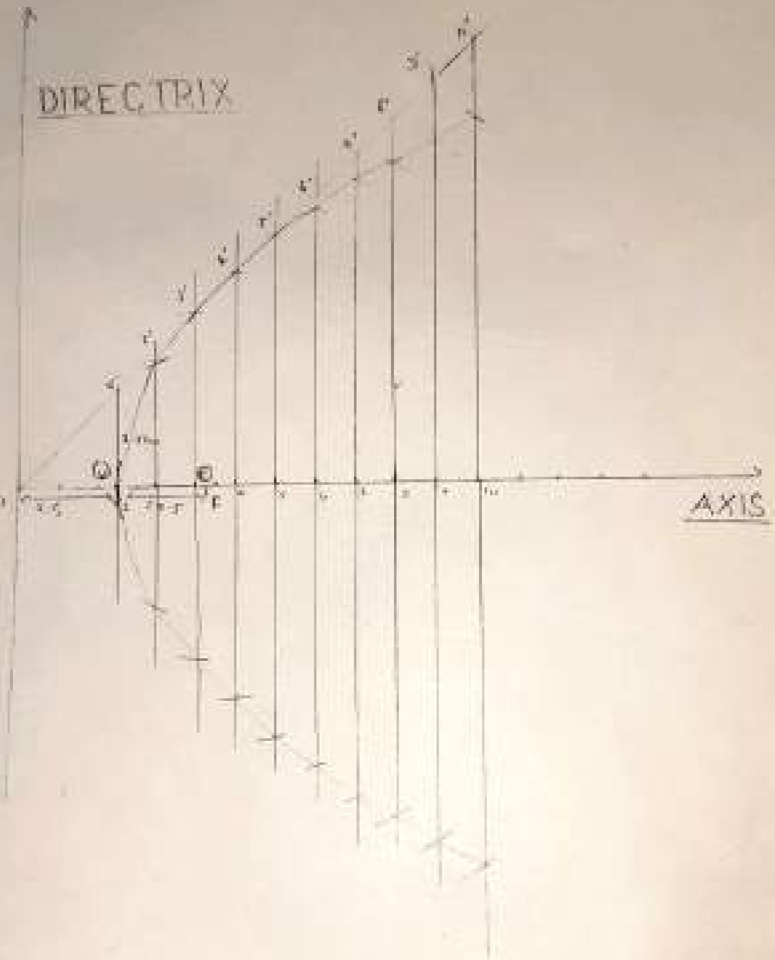
ELLIPSE

ance of the
mm and

2. Construct an Parabola when the distance of the focus from directrix is equal to 50 mm and eccentricity is 1.

3. Constru
from dir
eccentricit

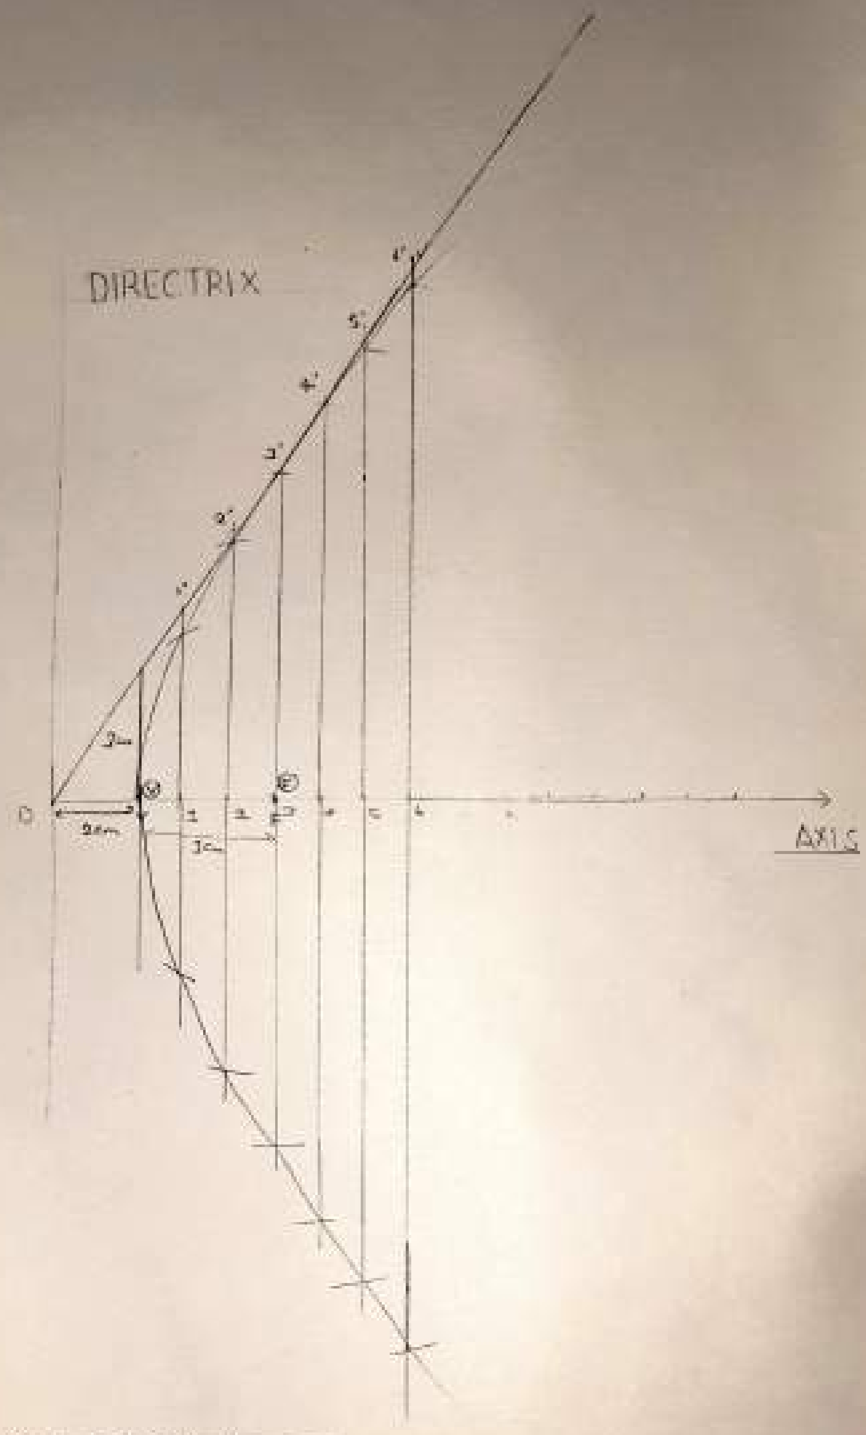
2 Construct on Parabola when the distance of the focus from director is equal to 5umm and eccentricity is 1



PARABOLA

3. Construct an Hyperbola when the distance of the focus from directrix is equal to 50 mm and the eccentricity is $3/2$.

ccentricity is 3/2 :



HYPERBOLA
